

- The name of your website: **Cookie Palace**
- The description of your topic: must contain at least 5 sentences **The website will allow users to order cookies online. There will be a variety of different cookies to choose from. They'll be able to add the cookies to their cart and order them. The website would be similar to other online ordering websites like Dominos pizza. The user can also upload their own reaction to the cookies.**
- A list of each of the page names: **Cookie Descriptions, Order Now, Previous Orders, Feedback, Contact Us**
- A description of the data you will be storing, manipulating and viewing. Go Into details, e.g. We will be storing a list of tools (Tool name, description, price, producer, ...). Only the administrator will be able to add / edit / delete, so we will need user accounts with login security. **A list of cookies will be stored, including the price, ingredients, and amount of cookies you can order. I would want the user to be able to add cookies to their cart and see their previous cookie orders. I would also like them to be able to upload feedback on the cookies.**
